WIREWOUND AND SWITCH PRODUCTS

Type R Potentiometer Reference Data

We are Mallory - DuraCap International Incorporated.

Mallory Type “LW”, “VW”, “VWG”, “VWS”, “R”, “M” and “MG” potentiometers are available in resistances from half an ohm to 100,000 ohms with power ratings from 3 watts to 12.5 watts. Audio attenuators are available in L-Pad, Dual L-Pad and T-Pad configurations with impedance values up to 5000 ohms and audio power up to 50 watts. Certain models of potentiometers are available in multi-gang configuration and with a shaft actuated switch.

Mallory slidewires are flat wirewound resistance elements on a phenolic core strip with solder pad or custom clip end terminations, to be used in equipment designed by the customer. The most common application is in HVAC control systems. Resistance can range from under 100 ohms to several thousand ohms.

Mallory rotary selector switches are available with up to 12 positions and 4 circuits, shorting and non-shorting.

Our controls have been supplied to industry and the military for more than 70 years. We have an extensive catalogue of stock parts and will make custom parts for OEM applications.

We have provided a list for your reference, and ordering part numbers for some of the current controls products. A complete listing of would number in the thousands.

In addition to a complete line of wirewound potentiometers, rheostats, audio attenuators and rotary selector switches, DuraCap manufactures Mallory aluminum electrolytic capacitors.

If you have questions, our sales and technical staff are available for consultation.
